Why have an assessment?

Typical blind spots

- Assuming you know what the problem is
- Assuming you don't have any problems
- Self fulfilling prophecy of measurement
- My cash is good, my AR is good
- False sense of security based on industry KPIs

Angie's list.
Reviews you can trust.

Second Opinion

Why do so many assessments collect dust?

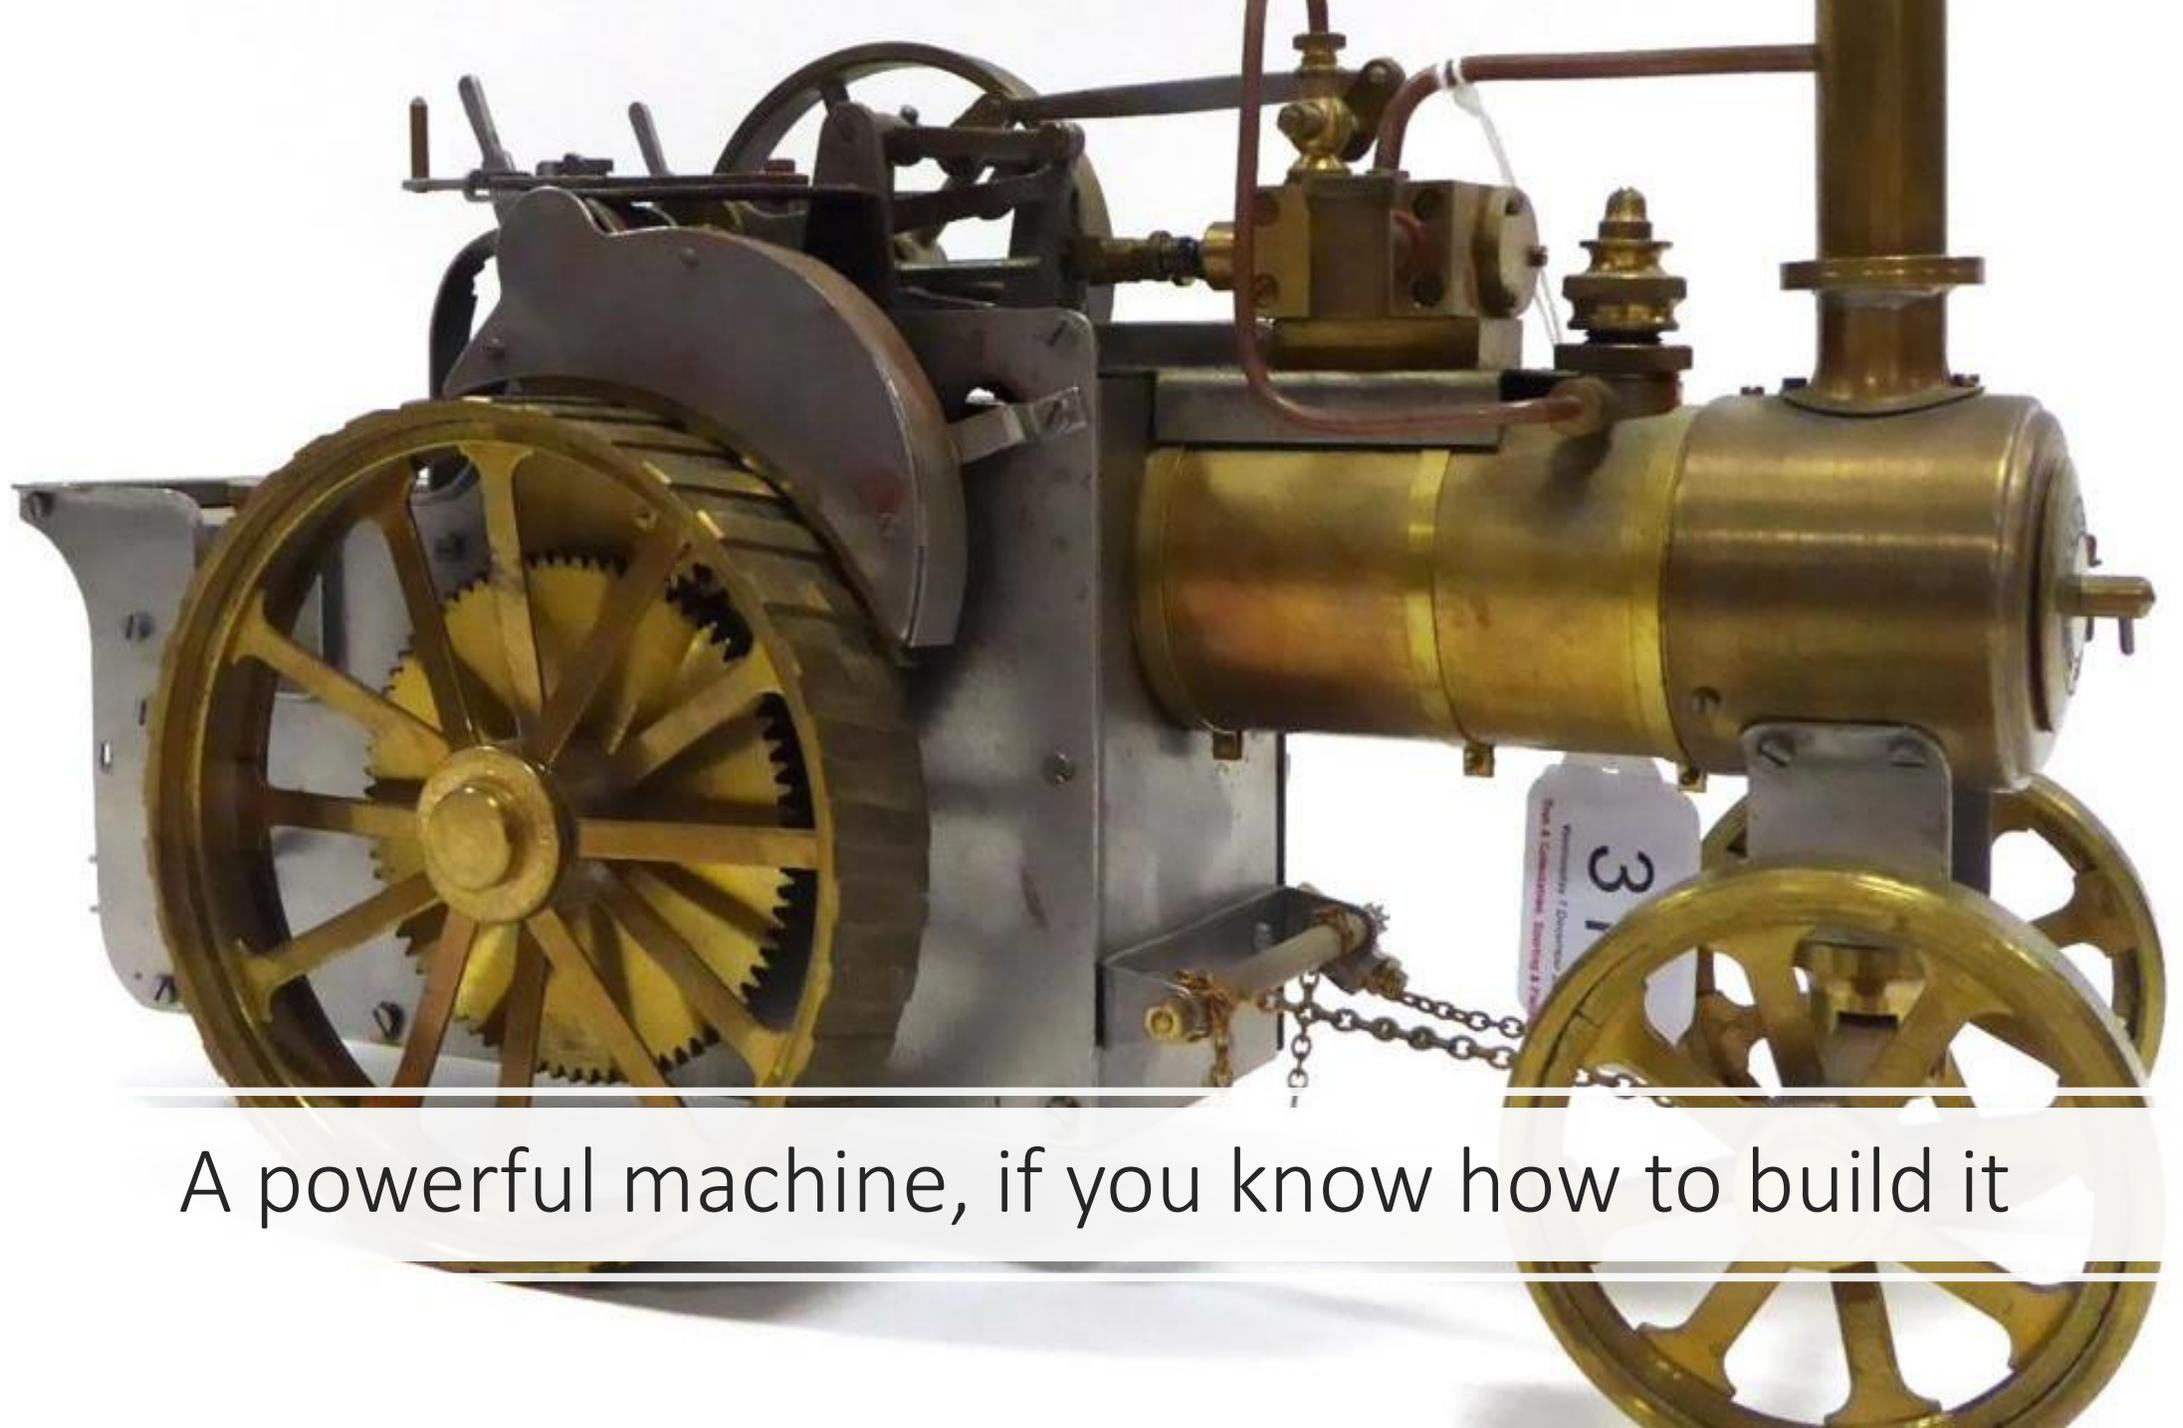

Back seat driver

A powerful machine, if you know how to build it

A powerful machine, if you know how to build it

Tools you can use

Assessment pitfalls

- Trying to do too much
- Not getting buy-in
- Bad timing
- Bad math: time + resources = outcome
- Too high-level
- Self preservation
- Working with consultants

Consultants see problems, but they don't fix them

Have they been in
your shoes?

Agenda

Why have one

Common pitfalls

Turning an assessment into a plan

Prioritizing and building buy-in

Measuring impact

Why it's worth it

Tools you can use

How to
ensure an
assessment
leads to a
plan

Must be
prescriptive, not
theoretical.

Must balance
investment vs
return.

Must prioritize

Must identify co-
dependencies
and risk

Must have
ownership

Must be
executable

Agenda

Why have one

Common pitfalls

Turning an assessment into a plan

Prioritizing and building buy-in

Measuring impact

Why it's worth it

Tools you can use

How to prioritize and obtain buy-in

Understand what is important to them and their definition of success

Clearly define what you need from them

Sacred cows, philosophical differences or political landmines

Communication should be frequent, transparent, bi-directional

Celebrate the small successes and ask for help around the failures

Personas for Revenue Cycle Stakeholders

Why have one

Common pitfalls

Turning an assessment into a plan

Prioritizing and building buy-in

Measuring impact

Why it's worth it

Tools you can use

How to measure impact

Data, data, data

Take a baseline measurement

Clearly define numerator and denominator source report

Make measurement transparent to all

Not another email spreadsheet

Clear scorecard, with meeting, engagement, discussion

Obtain feedback from stakeholders

Common pitfalls

Turning an assessment into a plan

Prioritizing and building buy-in

Measuring impact

Why it's worth it

Tools you can use

Why it's worth it

1-5% net improvement in net revenue

Prepares organization for change not just for today, but for the future

Prevents death by 1000 cuts

Understand where your gaps are.

Get a solid foundation before integrating tools, tech, other vendors
