The Growing Role of IoT in Virtual Care Delivery
How have you seen IoT evolve in healthcare in the past few years?
As the use of IoT in healthcare continues to expand, what recent advancements in care make it a natural fit for the IoT, especially when tied to health systems and hospitals?
What are the key challenges to adopting the IoT in healthcare and/or key compliance issues impacting the IoT in care delivery?
How are you seeing modern collaborative technologies and IoT platforms helping support care collaboration and empower patients to more actively monitor and report on their health data?
