@ChrisDeRienzoMD

“Technology is nothing.
What's important is that you
have a faith in people, that
they're basically good and
smart, and if you give them
tools, they'll do wonderful
things with them.”

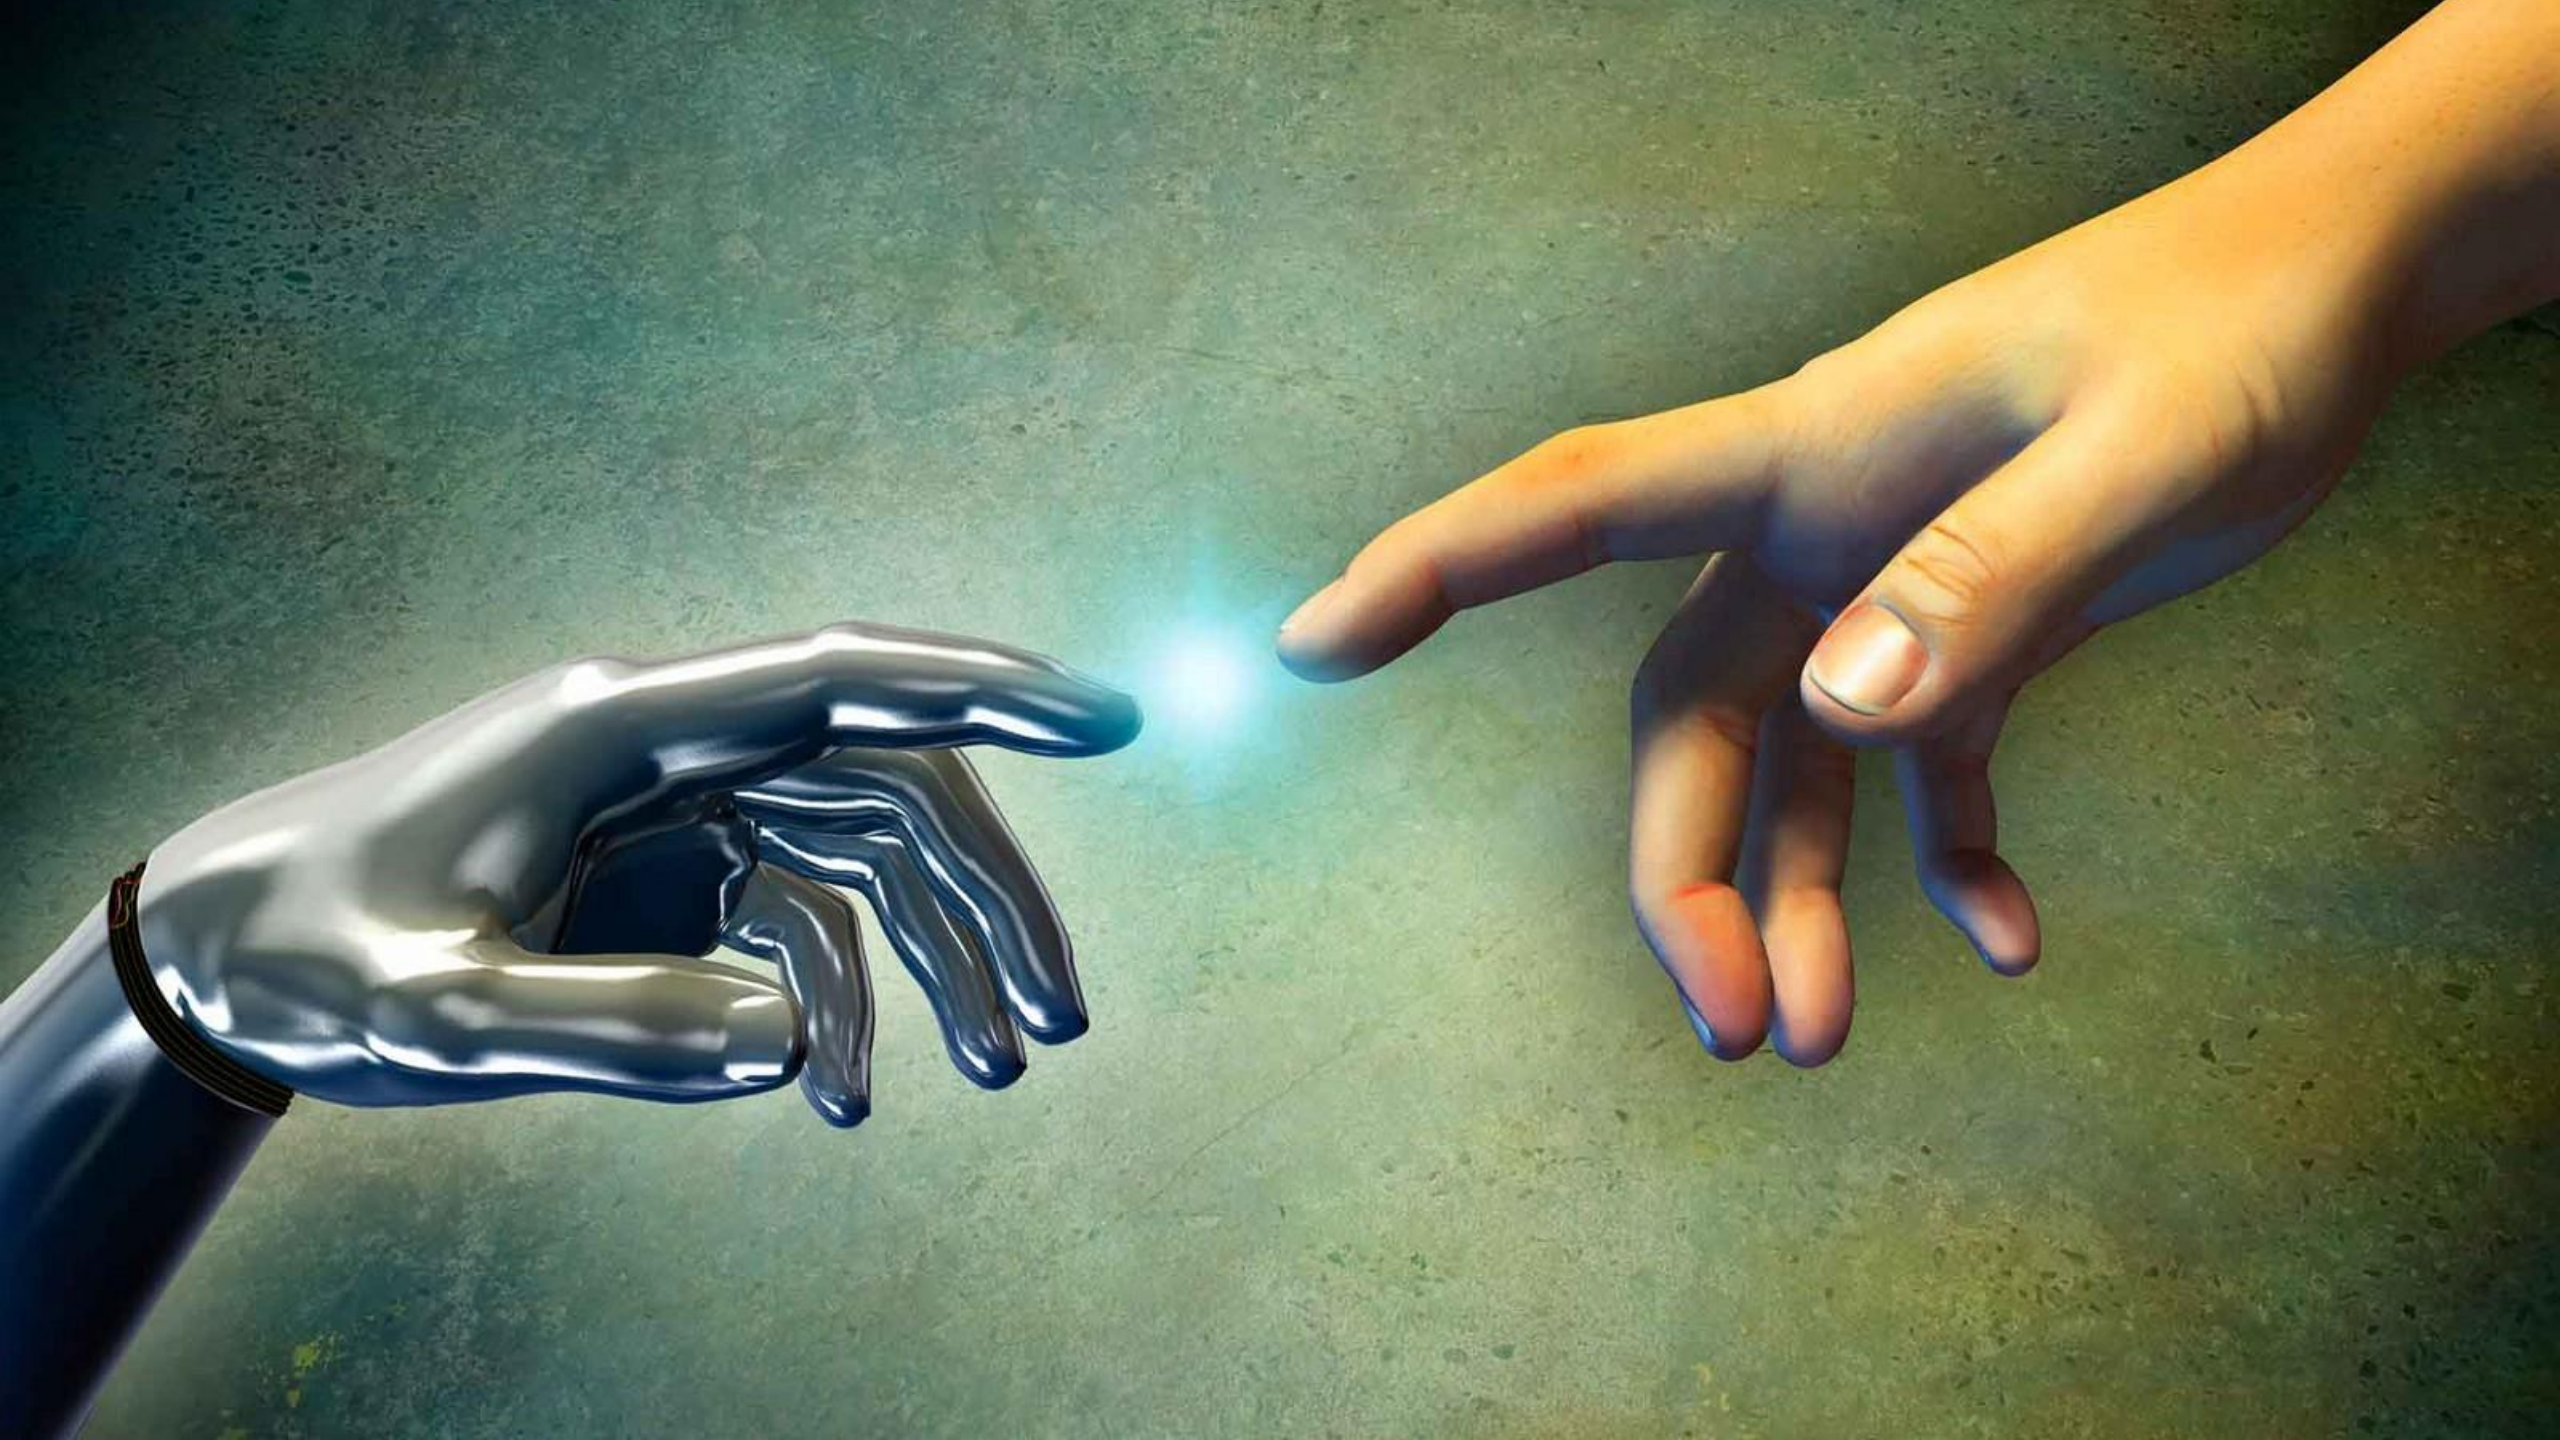

Calvin and Hobbes by Bill Watterson

WHEN YOU THINK HOW WELL
BASIC APPLIANCES WORK,
IT'S HARD TO BELIEVE
ANYONE EVER GETS ON
AN AIRPLANE.

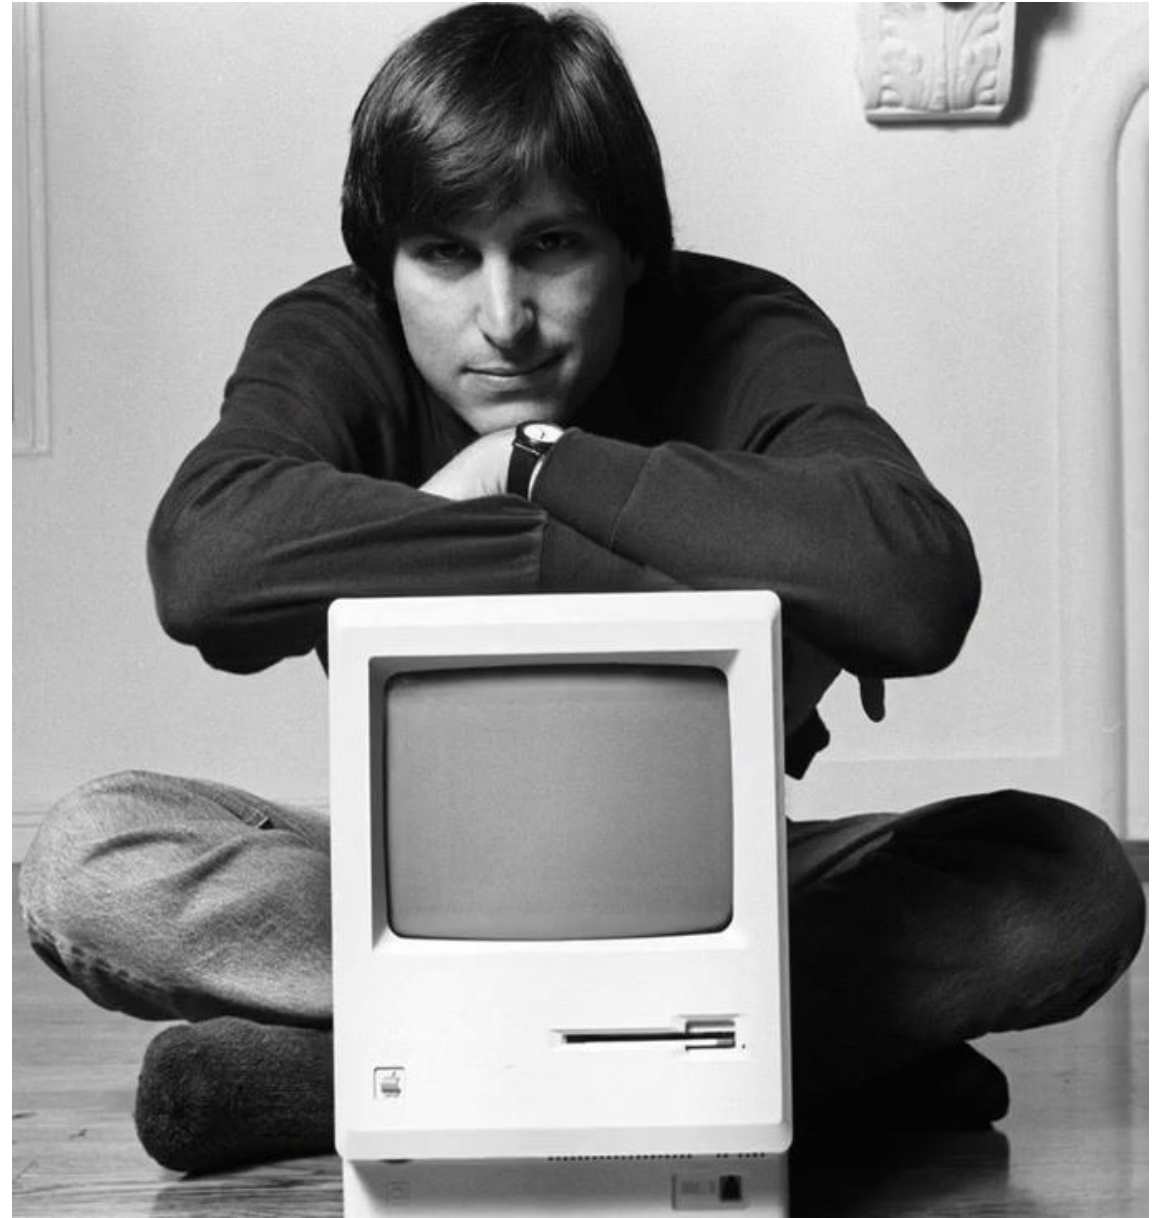

© 1992 Watterson Distributed by Universal Press Syndicate

“Technology is nothing.
What's important is that you
have a faith in people, that
they're basically good and
smart, and if you give them
tools, they'll do wonderful
things with them.”

“AI is nothing. What’s important is that clinicians and data scientists have faith in each other, that our core purpose is basically good, and if together we build the right tools for the right reasons, we can return humanity to the practice of medicine.”

Thank You!
