# the art of medicine
in a digital world

"Just when you think you know and understand the latest in technology, it sneaks up and saturates another part of our world."

PATIENTS

PEOPLE

RESOURCES

INFORMATION

The path to better outcomes and decreased costs will be paved with reliable interoperability and patient-centered systems. What really matters is connecting patients to the **people**, **information** & **resources** they need.

"Technology should be the wind at our backs, not in our faces."

TRANSLATES

CONNECTS

TRACKS

Technology **translates**, **connects** and **tracks** information. Taking these capabilities to create healthcare technology that supports and empowers the way we live will empower the patient to become his or her own best care provider.
