AZ QUOTES

Consultancy introduces *“The practice of ideation to understand the problem”*

- A structured methodology to define the problem?
- Understand **why** it hasn't been solved before ?
- Agree on **why** it can be solved now ?

Ideation methodology

- *A structured process of dissecting a business problem to clearly determine the **immediate and long term** needs of the organization.*
- *Consciously segment the problem by stakeholders and business needs, consciously peel back perception issues around identified problem statement and understand the contributing **factors of these perceptions**.*
- *Using a set of specific questions to determine the **timeliness, cultural limitations and change climate** within the organization that will influence the feasibility of proposed solutions.*
- *Determine if opportunities should be **postponed**, based on financial and change climate of the organization, or if these same opportunities should be **accelerated**.*
- *Bring to bear key priorities for the **CEO and C-suite** and determine how they influence both the definition and prioritization of the opportunities identified.*
