

# 2-WAY INSTANT NOTIFY

IMPROVE PATIENT FLOW  
COMMUNICATION AND STREAMLINE PATIENT CARE

A TeleTracking client experienced communication challenges

**80,000**

phone calls per year in patient placement.

**REDUNDANCY**

Multiple calls and pages to report bed assignments.

**DELAYS**

when informing ED and ICU of bed assignments.

**CONFUSION**

as to whether a bed assignment was sent or not.

Quick responses to individuals and groups

Staff accountability through reportable communications

Non-emergent communications such as patient updates and workflow information

Easy and dependable communication to support patient flow

**Two-Way Instant Notify**

**Capacity Management Suite™ Application Version 3.3.1+**

**Client Results After Using TeleTracking's Instant Notify to Support Patient Flow**

**ELIMINATED**

**400 HOURS**

in phone calls and failed contact attempts resulting in increased Charge Nurse productivity

**IMPROVED PATIENT CARE**

when Charge Nurses became more efficient with bed placement communications

**STANDARDIZED COMMUNICATION**

simplified and improved the patient placement process
